Definition: A school is a division of the school system consisting of a group of pupils composed of one or more grade groups, organized as one unit with one or more teachers to give instruction of a defined type and housed in a school plant of one or more buildings. More than one school may be housed in one school plant, as is the case when the elementary and secondary programs are housed in the same school plant.

### SCHOOL ACCREDITATION 1986-87

The Education Reform Act of 1982 created a performance-based accreditation system and made state accreditation a mandatory process for all public school districts. The performance-based system emphasizes outcome measures rather than quantitative factors and is designed to accredit school districts rather than individual schools. During school year 1986-87, the performance-based accreditation system was implemented, and the Commission on School Accreditation awarded an accredited status to each of the 153 public school districts and the four agricultural high schools representing a total of 836 schools. The state accreditation system remained voluntary for nonpublic and special schools in the state. The majority of the nonpublic schools are parochial, and the special schools are those established to serve special needs of students. During the 1986-87 school year, the Commission on School Accreditation received applications from and subsequently accredited 64 nonpublic schools and 19 special schools.

NOTICE - Due to revisions, data in the table above are not comparable to those previously published. Please see source to obtain further explanation and revised historical data.

<sup>1</sup> Data covers 180,000 full and part-time production workers in manufacturing, 6,100 non-supervisory employees in electric services, and 12,700 in banking who worked during or received pay for the payroll period including the 12th of the month. The average earnings are "Gross", that is, they reflect not only changes in basic hourly and incentive wage rates, but also such factors as premium pay for overtime work and shift differentials. The workweek information relates to average hours worked or paid for and is somewhat different from scheduled hours because of such factors as absenteeism, labor turnover, part-time work, overtime work and stoppages. These series are prepared by the Mississippi Employment Security Commission in cooperation with the Bureau of Labor Statistics of the United States Department of Labor.

<sup>2</sup>Where data for an individual establishment or reporting unit would not be divulged, monthly employment and quarterly wages are given for industry divisions and for two-digit and three-digit groups. Criteria for non-disclosure of individual employer data are as follows: In cases where there are fewer than three establishments or reporting units and one of these contains 80 percent or more of the employment of the division or group, employment and wages data are combined and shown with data for other divisions or groups. Such data are included in county totals.

<sup>3</sup>The data for these industries are included in the NDC classification code that immediately follows the code numbers in the table with the corresponding first two digits.

<sup>1</sup> Vehicles of the civilian branches of the Federal Government are given in this table. Vehicles of the military services are not included.

<sup>2</sup> This information, compiled chiefly from reports of state authorities, is incomplete in many cases. Some states give state-owned vehicles only; others exclude from registration certain classes, such as fire apparatus, and police vehicles. For the states not reporting state, county, and municipal vehicles separately from private and commercial vehicles and those reporting unsegregated totals only, classification by vehicle type has been approximated on the basis of other available data.

The number of courts reporting to the Department of Public Welfare affects the total children's cases and consequently the comparability from year to year of youth court statistics. Courts from only four counties (Bolivar, Hinds, Pike, and Warren) have reported one or more cases for each year from 1950 through 1972. The size of the courts not reporting also influences the total cases.

Because of many limitations the trend table does not show the extent of delinquency or neglect in this state and may be particularly misleading if only total number of cases is used to make comparisons between years.

<sup>1</sup> Commercial timberland is forest land which is producing or is capable of producing crops of industrial wood and not withdrawn from timber utilization by statute or administrative regulation. Areas qualifying as commercial timberland have the capability of producing in excess of 20 cubic feet per acre per year of industrial wood in natural stands. Currently inaccessible and inoperable areas are included.

<sup>2</sup> Includes Indian lands.

<sup>3</sup> Net volume of the saw log portion of live sawtimber trees in board feet, International  $\frac{1}{4}$ -inch log rule.

<sup>4</sup> Net volume in cubic feet of live sawtimber and poletimber trees from stump to a minimum 4-inch top (of central stem) outside bark or to the point where the central stem breaks into limbs.
